About us

Glow Heating Cooling Electrical was founded in 1997 by Nigel Hardy. Formerly known as Nigel Hardy Electrical Pty Ltd, the name was changed to better reflect the operations of the company. Specialising in the complete installation of air conditioning, heating systems, electrical and solar power services to residential, commercial, industrial and public developments, we have grown in capability and the areas we service over the last 20 years.

Our Strengths

Personal strengths in managing both a business unit and projects are credited to strong team leadership, effective organisational/time management skills, and amiable personalities and interpersonal qualities. These enable us to deliver a high standard of professionalism at every level.

Our Aims

We are able to design, install and commission complete mechanical, electrical, solar power and hydronic heating systems from concept through to handover. We take an active role in embracing technology as a solution in the ever-changing world in which we live. We help clients achieve their goals.

Our Staff

Our staff are continually updated and skilled in the latest products and undergo specialist training with registered training organisations in order to offer our clients the best possible service and advice.
