

MORSØ 6143

Timeless Innovation

Morsø has worked hard to combine their long stove tradition with modern innovation. The 6143 design is complete in every sense; its form, construction and cast iron components blend naturally together.

Employing a refined and timeless design idiom, this perfect design with a large glass door, concealed hinges and simple lines makes the Morsø 6143 a compliment to any room.

As the fire fans the flames, the stove's unique combustion system helps ensure a higher temperature in the combustion chamber, allowing it to burn off the flue gases, and providing you with a cleaner, environmentally friendly combustion along with a higher level of efficiency, ensuring superior fuel economy.

Constructed using only the highest quality robust cast iron the stove provides a user friendly one-handle system for heat output control, a convenient open log storage cavity, and a curved wide door allowing easy access to the fuel bed. In addition to the simplistic operation, the design sets new standards of easy maintenance.

Height	950mm
Width	451mm
Depth	386mm
Internal Firebox	
Height	240mm-300mm
Width	260mm-315mm
Depth	205mm
Avg. Area Heated	80-100m ² - / 6.0Kw
Efficiency	65.0%
Emissions	1.5g/kg
Heat Transfer	Radiant

Clearance to Furniture	800mm

MORSØ 6143 FEATURES AND BENEFITS

- More than 150 years of cast iron experience means top quality castings that sets the industry standard
- Excellent clearances
- Chromium treated internal castings for durability
- Reversible flue collar for either top or rear venting providing installation flexibility
- Superior air wash system keeps the glass clean for unparalleled fire viewing
- Tertiary Air system that draws air up the back of the stove and then injects it to the upper chamber to burn off excess gases
- Contrasting removable stainless steel handle to ensure a cool touch when stoking or refuelling the fire
- Single air control for ease of operation
- Rugged ash pan made of heavy gauge steel
- 10 years limited warranty
