- **Top or rear flue exit** - flexible installation
- **Secondary burn combustion system** - clean burning, efficient, reduces creosote build-up

heatlife™ by  **hearthstone**

Hearthstone wood stoves provide exceptional heat retention

Hearthstone wood stoves are made with soapstone, a natural material that absorbs the high heat of a fire, then radiates a gentle heat into the room. This means your home stays at a comfortable temperature - the Soapstone Comfort Zone.

Hearthstone wood stoves stay warmer longer, keeping your home in the comfort zone.

Information in this brochure is to assist you in your choice of a suitable fire. It is not intended to be all the information required to install the fire and does not replace the installation manual which provides more detailed information. In the interest of product development Hearthstone reserves the right to change specifications without prior notice.
